

ECLIPSX™ -Design

Display Design Made Easy

ECLIPSX™ -Design is Com-Net's revolutionary new display design tool that lets you create or modify display pages for monitors, plasma displays, and TFT-LCD displays. This powerful design application gives you design features, such as dynamic sizing of graphics, yet is remarkably easy to navigate.

Display Design That Anyone Can Use

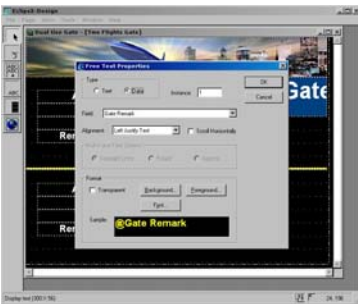

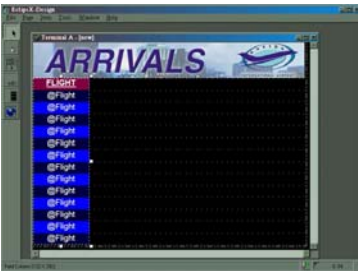

ECLIPSX-Design makes designing and changing the layout of your displays as easy and intuitive as drag, drop and click!

Its graphical user interface is a well-designed Windows®-based graphics design application with all the tools you need to add or change display elements.

Features include:

- **Easy-to-use tool bars, buttons and menus.**
- **Drag-and-drop capabilities.**
- **Dynamic sizing of graphics, text, columns and full-motion video clips.**
- **Handy cut, copy and paste tools.**
- **Easy-to-use dialog boxes and drop-down list boxes.**
- **What-you-see-is-what-you-get design environment.**
- **Effortless insertion of full-motion video clips and Web pages.**
- **Built-in transitions for code sharing.**
- **Live data viewing to instantly see new screen designs.**
- **Password protected. Only System Administrators are allowed to "publish" newly designed pages.**

The application also comes with a variety of adjustable templates to serve as a foundation for your new display designs.

Easy Customization

ECLIPSOX-Design lets you customize your text and screen appearance with:

- **A large selection of Windows fonts and point sizes**
- **Text attributes, including bold, underline and blink**
- **A palette of 16 million background and text colors**
- **Wallpaper background**

With ECLIPSOX-Design, the size of a graphic image is no longer a design limitation. You'll be able to stretch and resize a graphic to fit the display. Additional features include grid lines, sizing handles and "snap to grids," to make placing and sizing graphic images, as well as columns and text, quick and easy.

Best of all, ECLIPSOX-Design lets you preview your newly designed screens instantly, using live data, at any time during the design process.

Enabled by the Newest Internet Web Technology

To develop this versatile design application, Com-Net leveraged the power of the latest Web technology created for the Internet – XML and XSLT – to bypass the complex, rigid rules typically associated with dynamic information display.

ECLIPSOX-Design and ECLIPSOX-Display, our client/server-based information display system application, were designed and developed together from the ground up – eliminating the limitations of yesterday's technology.

A Bright New Family of Information Display Products

With its ECLIPSOX-family, Com-Net offers you not just an exciting new display design tool, but also integrated solutions for information display, seamless connection to other systems, reporting, advertising scheduling and tracking, Web integration and wireless access.

Contact your Com-Net representative today to see how ECLIPSOX can work for you.
