

Transit Information Display System

ECLIPSX™ -Announce

Total Customer Communication

ECLIPSX-Announce converts your passenger information display system into an emergency messaging and customer communication system. Its special messaging features make ECLIPSX a **total customer information system** — one that meets the communication needs of today's mass transit providers and their passengers.

ECLIPSX-Announce provides

- **Emergency messaging by zone**
- **Ticket counter messaging**
- **Security messaging**

Immediate Messaging When and Where You Need It

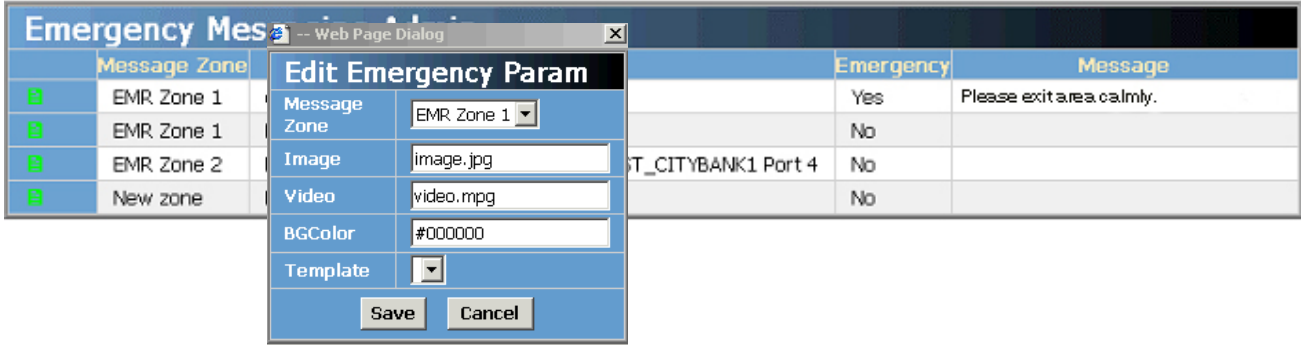

With ECLIPSX-Announce, messages can be quickly and effectively displayed on displays throughout a terminal by zoned area.

Emergency and security messaging can notify specific passengers of special conditions or instructions (e.g., evacuation) or to proceed to a special location for baggage inspection.

Ticket counter messaging can inform queued passengers of wait times and delays, as well as special messages and alerts.

The ECLIP SX Advantage

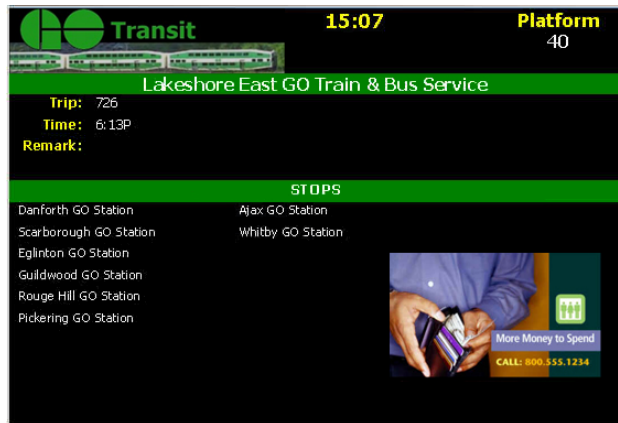

ECLIP SX-Announce is an integrated ECLIP SX module that offers all the user-friendly features of the ECLIP SX family of information display system products. Messages are easy to view and create, using ECLIP SX's convenient pages and dialogs.

Versatile Information Display Products

The ECLIP SX product family has been designed to respond to your changing needs with flexibility and ease. Com-Net offers you not just a messaging module for emergency and customer communication, but also integrated solutions for information display, seamless connection to other systems, reporting, Web integration and wireless access.

Contact your Com-Net representative today to see how ECLIP SX can work for you.
